Functional Behaviour ABC Observation Sheet

Framework: Functional Behaviour Assessment (FBA) & Applied Behaviour Analysis Methodology

www.rabbiapsychologist.com

Clinical Parent Resource

Child's Name:

Target Behaviour:

Observation Period:

Recorded By:

Date & Time	A: Antecedent (Trigger)What happened immediately before? (Demand, transition, loud noise, hunger)	B: Behaviour (Observable)What did child do? (Screaming, hitting, running, refusal). Intensity 1-5.	C: Consequence (Response)What happened immediately after? (Task postponed, attention given, comfort)
Example: Mon 4:30 PM	Asked to turn off iPad and start maths homework after school.	Threw tablet on sofa, screamed "I hate maths!", ran to bedroom. (Intensity: 4/5, Duration: 15 min).	Parent followed into room, argued for 10 min, then delayed maths until after snack. (Outcome: Task delayed).

Incident #1

Incident #2

Incident #3

Incident #4

Incident #5

How to Uncover the Function (The 4 Needs Behind Every Behaviour):

1. Escape / Avoidance

Does the behaviour reliably delay a hard task, difficult conversation, or sensory discomfort?

2. Attention Seeking

Does the behaviour produce immediate verbal reaction, eye contact, or co-regulation from adults?

3. Access to Tangible

Does the behaviour happen when denied a specific toy, snack, activity, or device privilege?

4. Sensory Regulation

Does the child seem physically overwhelmed, seeking deep pressure, or covering ears/eyes?

Clinical Notice: Behaviour tracking logs are clinical observation aids. They do not replace diagnostic consultation or comprehensive functional behavior assessments.
