Speech & Language Milestone Checklist by Age

AGE MILESTONE	EXPECTED COMMUNICATION MARKERS	RED FLAG WARNING SIGNS (SEEK SLP ASSESSMENT)
18 Months	• Uses at least 10-20 consistent single words • Imitates environmental words and sounds • Points to familiar objects in a book when named	Zero words; no pointing or waving gestures; lack of response to spoken name.
24 Months	• 50+ single words spoken spontaneously • Combines two words ("more milk", "bye-bye daddy") • Speech understood by parents at least 50% of time	Less than 20 words; echoing words without communicative intent; inability to follow simple 1-step directions.
36 Months	• 3 to 4 word sentences ("I want to play outside") • Asks "Why?", "What?", "Where?" • Speech understood by unfamiliar adults 75% of time	Speech unintelligible to strangers; frequent stuttering or blockages; loss of previously acquired words.
48 Months	• Tells a simple narrative story about their day • Correct use of pronouns (he/she/I/you) • Speech 90-100% intelligible in conversation	Struggles to construct grammatically coherent sentences; persistent sound substitutions; difficulty interacting with peers.

Hearing Check Prerequisite: Before starting speech therapy, always obtain a formal audiologist evaluation to rule out chronic middle ear fluid (glue ear).
